form-description

The diagram illustrates a form layout. A large rectangular box, labeled 'form-container' on the left, contains the form elements. At the top of the container is a long black bar. Below this is another long black bar. Underneath that is a table with two columns and three rows, each cell containing a black bar. At the bottom of the container is a long black bar. The label 'form-title' is positioned above the top bar, with a vertical line connecting it to the bar. The label 'form-description' is positioned below the bottom bar, with a vertical line connecting it to the bar.
